

Environmental Justice Index

Charles County, Maryland

The **Environmental Justice Index (EJI)** measures the cumulative impacts of environmental injustice in communities across the United States. The EJI ranks are based on percentile rankings of all tracts in the contiguous United States¹.

The EJI ranks communities on 36 indicators and 3 modules, which are then combined to create 1 overall EJI rank.

36

1 of 34 tracts are the Most Burdened

The most burdened tracts for **Charles County** are tracts with **EJI ranks of > 0.65**. These are tracts that might need special attention or additional action when addressing environmental injustice and health inequities.

Indicator Rank Distribution

Among these **1** tracts, which **environmental burden** and **social vulnerability** indicators are contributing the most to burden? The figures below display the number of tracts by categories of burden or vulnerability. Higher numbers to the right indicate more tracts experiencing high burden.

Environmental Burden

Social Vulnerability

Health Vulnerability

Among these **1** tracts, how many are **flagged for high prevalence** in the following **pre-existing chronic health conditions**?

Environmental Justice Index

Charles County, Maryland

EJI + Climate Burden

The **EJI + Climate Burden** Rank is a supplement to the base EJI Rank. The supplement measures cumulative impacts, including climate-related burdens, on the health of U.S. communities. **EJI + Climate Burden** is based on the ranks for all 3 base EJI Modules and the **EJI Climate Burden Module** Rank.

1

Highly burdened tracts for **Charles County** are tracts with **EJI + Climate ranks of > 0.75**. Climate burdens can add to existing burdens and stressors.

Among these **1** tracts, indicators are listed in order of contribution to burden. For each indicator, the figure displays the number of tracts that fall into progressively higher categories of burden or vulnerability.

Climate Burden
